**AGENCY:** United States Patent and Trademark Office, Commerce.

**ACTION:** Final rule; correction.

**SUMMARY:** The United States Patent and Trademark Office (Office) published a final rule in the Federal Register of September 20, 2000, revising the rules of practice in patent cases to implement the eighteen-month publication provisions of the American Inventors Protection Act of 1999. This document corrects two errors in that final rule.

**EFFECTIVE DATE:** November 29, 2000.

**FOR FURTHER INFORMATION CONTACT:** Concerning this notice: Robert W. Bahr by telephone at (703) 308-6906, or by mail addressed to: Box Comments—Patents, Assistant Commissioner for Patents, Washington, D.C. 20231, or by facsimile to (703) 872-9411, marked to the attention of Robert W. Bahr.

**SUPPLEMENTARY INFORMATION:** The Office published a final rule in the Federal Register of September 20, 2000 (65 FR 57023), entitled "Changes to Implement Eighteen-Month Publication of Patent Applications." This document corrects errors in § 1.55 and § 1.99 as discussed below.

Section 1.55(a) should refer to "35 U.S.C. 119(a) through (d) and (f), 172, and 365(a) and (b)" rather than "35 U.S.C. 119(a) through (d), 172, and 365(a)" (references to 35 U.S.C. 119(f) and 365(b) were inadvertently omitted). Section 1.55(c) should refer to "35 U.S.C. 119(a) through (d) and (f), and 365(a)" rather than "35 U.S.C. 119(a) through (d) and 365(a)" (a reference to 35 U.S.C. 119(f) was inadvertently omitted).

Section 1.99(f) should not include its last sentence ("[N]o further submission on behalf of the member of the public will be considered, unless such submission raises new issues which could not have been earlier presented.").

In rule FR Doc. 00-23822, published on September 20, 2000 (65 FR 57023), make the following corrections:

**§ 1.55 [Corrected]**

On page 57053, in the third column, in § 1.55, in paragraph (a) introductory text, in lines 5 and 6, correct "119(a) through (d), 172, and 365(a)" to read "119(a) through (d) and (f), 172, and 365(a) and (b)"; and on page 57054, in the first column, in § 1.55, in paragraph (c) introductory text, in each of lines 4, 9, and 19, correct "119(a)-(d) or 365(a)" to read "119(a) through (d) and (f), or 365(a)".

**§ 1.99 [Corrected]**

2. On page 57056, in the second column, in § 1.99, in paragraph (f), in lines 14 through 19, remove the sentence "No further submission on behalf of the member of the public will be considered, unless such submission raises new issues which could not have been earlier presented."

**Simplification of Certain Requirements in Patent Interference Practice**

**AGENCY:** United States Patent and Trademark Office, Commerce.

**ACTION:** Final rule.

**SUMMARY:** The United States Patent and Trademark Office amends its rules of practice in patent interferences to simplify certain requirements relating to the declaration of interferences and the presentation of evidence.

**EFFECTIVE DATE:** December 26, 2000.

**FOR FURTHER INFORMATION CONTACT:** Fred McK-

elvey or Richard Torczon at 703-308-9797.

**SUPPLEMENTARY INFORMATION** :

**Background**

An interim final version of this rulemaking was published at 65 FR 56792, Sept. 20, 2000, and also at U.S. Patent and Trademark Office, 1239 Off. Gaz. 125 (Oct. 17, 2000). The rationale for the rulemaking appears with the interim rule.

**Comments**

The interim rule elicited two comments. One comment notes a reference in 37 CFR 1.671(e) to a rule that was deleted. That reference is eliminated in this final rule. Any other references to deleted rules in subpart E of this title should be considered obsolete. They will be eliminated in a future rulemaking.

A second comment raised a concern as to whether exhibits should be numbered, noting that there is no patent interference rule requiring that exhibits be numbered. Each exhibit needs to be identified in some unique manner. All interferences declared by the Board of Patent Appeals and Interferences (Board) at this time are subject to a "Standing Order" that requires that exhibits be numbered.

The same comment noted that former 37 CFR 1.682 authorized placing a publication in evidence without the need for an affidavit. According to the comment, affidavits will now be necessary. Publications generally may be placed in evidence in interference cases without an affidavit. If an objection is made by an opponent, e.g., for lack of authenticity, then under the Board's practice the party has a period of time within which to supplement its evidence by properly authenticating the publication. The Board expects few, if any, problems with the admissibility of most printed publications given that most parties will have no reason to question the authenticity of most printed publications.

**Regulatory Flexibility Act**

This rulemaking is procedural and is not subject to the requirements of 5 U.S.C. 553 so no initial regulatory flexibility analysis is required under 5 U.S.C. 603.

**Executive Order 13132: Federalism Assessment**

This rulemaking does not contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (August 4, 1999).

**Executive Order 12866**

This rulemaking has been determined to be not significant for purposes of Executive Order 12866 (September 30, 1993).

**Paperwork Reduction Act**

This interim rule creates no information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

**List of Subjects in 37 CFR Part 1**

Administrative practice and procedure, Inventions and patents.

For the reasons stated in the preamble, the United States Patent and Trademark Office amends 37 CFR Part 1 as follows:

**PART 1 RULES OF PRACTICE IN PATENT CASES**

1. Amend the authority citation for 37 CFR Part 1 to read as follows:

**Authority:** 35 U.S.C. 2(b)(2), unless otherwise noted.

2. Amend Sec. 1.601(f) to revise paragraph (f) to read as follows:

Sec. 1.601 Scope of rules, definitions.

* * * * *

(f) A count defines the interfering subject matter between two or more applications or between one or more applications and one or more patents. When there is more than one count, each count shall define a separate patentable invention. Any claim of an application or patent that is designated to correspond to a count is a claim involved in the interference within the meaning of 35 U.S.C. 135(a). A claim of a patent or application that is designated to correspond to a count and is identical to the count is said to correspond exactly to the count. A claim of a patent or application that is designated to correspond to a count but is not identical to the count is said to correspond substantially to the count. When a count is broader in scope than all claims which correspond to the count, the count is a phantom count.

* * * * *

3. Revise Sec. 1.606 to read as follows:

Sec. 1.606 Interference between an application and a patent; subject matter of the interference.

Before an interference is declared between an application and an unexpired patent, an examiner must determine that there is interfering subject matter claicf1 in the application and the patent which is patentable to the applicant subject to a judgment in the interference. The interfering subject matter will be defined by one or more counts. The application must contain, or be amended to contain, at least one claim that is patentable over the prior art and corresponds to each count. The claim in the application need not be, and most often will not be, identical to a claim in the patent. All claims in the application and patent which define the same patentable invention as a count shall be designated to correspond to the count.

4. Amend Sec. 1.671 to revise paragraphs (a) and (e) to read as follows:

Sec. 1.671 Evidence must comply with rules.

(a) Evidence consists of affidavits, transcripts of depositions, documents and things.

* * * * *

(e) A party may not rely on an affidavit (including exhibits), patent, or printed publication previously submitted by the party under Sec. 1.639(b) unless a copy of the affidavit, patent, or printed publication has been served and a written notice is filed prior to the close of the party's relevant testimony period stating that the party intends to rely on the affidavit, patent, or printed publication. When proper notice is given under this paragraph, the affidavit, patent, or printed publication shall be deecf1 as filed under Sec. 1.640(b), Sec. 1.640(e)(3), or Sec. 1.672, as appropriate.

Because Technology Centers 2100 and 2600 have been in existence less than a full year, the statistics for Technology Centers 2100 and 2600 are estimations.

Of the 6230 pending appeals, 1919 are currently assigned to administrative patent judge dockets.
With the exception of a limited number of appeals involving special circumstances, the Board of Patent Appeals and Interferences is currently deciding appeals received at the Board as follows:

**Reference Collections of U.S. Patents and Trademarks**
**Available for Public Use in Patent and Trademark Depository Libraries**

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan, the Sunnyvale Center for Innovation, Invention and Ideas (SCI[3]) at the Sunnyvale Public Library in Sunnyvale, California and at the South Central Intellectual Property Partnership at Rice (SCIPPR) at the Fondren Library of Rice University in Houston, Texas.

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
